

H160

The H160 opens a new chapter in the history of Airbus Helicopters. It has been designed to create added value for customers with its performance, economic competitiveness, safety and comfort. Both cleaner and quieter, the H160 takes a step forward in showing respect for the environment.

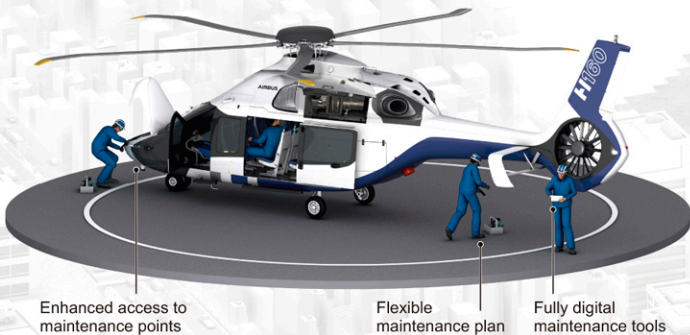

NEW-GENERATION DESIGN FOR GREATER PASSENGER COMFORT AND PERFORMANCE

- Blue Edge® blades
- Biplane stabiliser™
- Canted Fenestron®
- Full-composite airframe

NEXT-LEVEL PERFORMANCE

- More than one tonne of payload up to 120 NM radius-of-action
- New-generation turboshaft engine
- Faster than ever

Light maintenance plan

Enhanced access to maintenance points

Flexible maintenance plan

Fully digital maintenance tools

Built-in safety

Exceptional handling and external visibility

- Extra-large push-out windows
- Power margins anytime
- Full-flight envelope protection

Technical data

Capacity:
1 or 2 pilots + up to 12 passengers

MTOW:
5,670 kg
(12,500 lb)

Fast cruise speed:
155 kts
(285 km/h)

Maximum range:
>460 NM

Maximum endurance:
4 h 10 m
(+20 min reserve)

Less fuel burn:
-15%
compared to previous generation engines

Missions

Transport

Greater passenger comfort thanks to low sound and low vibration in a large, bright cabin.

EMS

The largest cabin volume in its class for better patient care.

Private & business aviation

This is how exceptional feels.

Public services

A wide range of equipment for public services missions.
